- Teamwork
- Active listening

About Me

As a Third-year B.Tech CSE student, specializing in frontend development with hands-on experience in building responsive, user-friendly web interfaces. Driven by creativity and innovation, I'm eager to contribute fresh ideas and technical expertise to dynamic projects and fast-paced teams.

Projects

Marriage Event Management

Developed and managed a comprehensive marriage event management website, enabling users to plan weddings with ease, from venue booking to vendor coordination. Focused on delivering a seamless user experience through responsive design and efficient backend integration.

Gym Spot

Designed and developed a user-friendly gym website, offering features such as class scheduling, membership management, and personalized fitness plans. Ensured a seamless experience with responsive design and optimized performance for enhanced user engagement.

Event Management for College

Developed and managed a comprehensive event management website for college events, featuring online event registration, scheduling, and real-time updates. Implemented features like event listings, participant tracking, and notification systems, ensuring seamless coordination between students, organizers, and faculty. Focused on creating a user-friendly interface with mobile responsiveness and optimized performance to enhance engagement and streamline event workflows.
